

AGME Sprint Retro Notes

Team: WED-18.30-6

Sprint: 1

Date: 09/09/2020

Attended:

Scrum Master: Frankie Lay

Product Owner: Ujj Barta

Development team: Axel Devara, Jacob Kumar, Abhiraj Singh, Wailam Yip

1. Things That Went Well

The Scrum Team was able to replicate the wireframes closely and prepared well in advance when connecting the front-end and back-end. The Scrum Team attempted all assigned tasks and were coordinated throughout the Sprint.

2. Things That Could Have Gone Better

There were a few features that the Scrum Team did not complete on time as there were a few minor difficulties in the front-end and back-end development. Front-end development experienced page freezes and the back-end did not satisfy the front-end requirements which prevented the Scrum Team from using the back-end data.

3. Things That Surprised Us

Integrating CircleCi and deploying on Amazon Web Services (AWS) came as an unexpected challenge for the Scrum Team. The Scrum Team had to commit further time into integrating and deploying the application.

4. Lessons Learned

The Scrum Team has learnt how to deploy an AWS application using CircleCI integration and Docker.

5. Final Thoughts

The Scrum Team will integrate the remaining features of Sprint 1 in the next Sprint and assure that the Scrum Team will begin development earlier.
